SUMMARY

AI & Data Science enthusiast with hands-on experience in Machine Learning, Python, and data-driven problem solving. Built practical AI projects including Retrieval-Augmented Generation (RAG) chatbots and predictive models using real-world datasets. Passionate about developing intelligent systems and continuously learning modern AI technologies to solve real-world problems.

EDUCATION

Parul Institute Of Engineering and Technology

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 7.66/10

- **Relevant Coursework:** Object-Oriented Programming, DBMS, Operating Systems, Data Structures

PROJECTS

AI-Powered Stock Market Multi-Agent System | [Python, Streamlit, Gen AI, AI Agents](#) | **2025**
[Live](#)

- Developed a multi-agent AI stock market analysis platform integrating Yahoo Finance data, Generative AI, and autonomous agents to analyze, compare, and summarize real-time stock market insights.
- Built an interactive Streamlit dashboard with AI-powered stock comparison, financial trend analysis, and conversational insight generation using APIs, prompt engineering, and vector-based knowledge retrieval.

COVID-19 Data Analysis & Future Case Forecasting | [Python, ML, Time-Series](#) | [Live](#) **2025**

- Trained and compared ML models (Linear Regression, Random Forest, XGBoost), achieving $R^2 \approx 0.999$ with feature importance analysis on global COVID-19 epidemiological data.
- Developed ARIMA-based time-series forecasting and visualized global case trends using Matplotlib/Seaborn to project future outbreak patterns.

Flowers Knowledge RAG Chatbot | [Python, LangChain, Gemini, ChromaDB, Streamlit](#) | **2025**
[Live](#)

- Built an end-to-end **Retrieval-Augmented Generation (RAG)** pipeline using **LangChain**, storing vector embeddings in **ChromaDB** via Google Gemini Embedding model with recursive text splitting.
- Deployed an interactive **Streamlit** web application with real-time Q&A, custom grounded prompt template, and Google Gemini LLM as the generative backend with fallback handling.

TECHNICAL SKILLS

Programming: Python, Java, C, SQL

AI / Machine Learning: TensorFlow, Scikit-Learn, NLP, Computer Vision, Generative AI, Agentic AI Systems, AI Agents, Langflow

Frameworks & APIs: FastAPI, LangChain, LangGraph, Streamlit

Databases: MongoDB, ChromaDB

Tools & Platforms: Git, Tableau, Power BI, Microsoft Azure

CERTIFICATIONS

- **Microsoft Certified: Azure Data Scientist Associate (DP-100)** ([View Certificate](#)) **2024**
- **Microsoft Certified: Azure AI Engineer Associate (AI-102)** ([View Certificate](#)) **2025**
- **Oracle Cloud Infrastructure Data Science Professional** ([View Certificate](#)) **2025**
- **Oracle Cloud Infrastructure Generative AI Professional** ([View Certificate](#)) **2025**
