SUMMARY

Computer Science student with practical experience in Machine Learning, Python, and Generative AI. Currently working as an AI/ML Intern at Rubixe on real-world capstone projects involving predictive modeling and data analysis. Skilled in developing AI solutions using RAG, multi-agent systems, and predictive machine learning techniques.

WORK EXPERIENCE

Rubixe — AI/ML Intern

Remote

Present

- Working on **Machine Learning capstone projects** involving customer transaction prediction, earthquake damage prediction, and flight price prediction using real-world datasets.
- Developing end-to-end **Data Science workflows** covering data preprocessing, feature engineering, model training, evaluation, and model comparison using **Python, Pandas, NumPy, Matplotlib, Seaborn, and Scikit-Learn**.
- Building and evaluating multiple **classification and regression models**, comparing appropriate performance metrics, and identifying suitable models for potential production deployment.
- Applying Machine Learning techniques to **banking, earthquake damage, and flight pricing** problems, with a focus on data quality, feature engineering, model selection, and predictive performance.

EDUCATION

Parul Institute Of Engineering and Technology

B.Tech in Computer Science and Engineering

2023 – 2027

CGPA: 7.77/10

- Relevant Coursework:** Object-Oriented Programming, DBMS, Operating Systems, Data Structures

PROJECTS

AI-Powered Stock Market Multi-Agent System | Python, Streamlit, Gen AI, AI Agents | [Live](#)

2025

- Developed a multi-agent AI stock market analysis platform integrating Yahoo Finance data, Generative AI, and autonomous agents to analyze and summarize real-time market insights.
- Built an interactive Streamlit dashboard for stock comparison and financial trend analysis using APIs, prompt engineering, and vector-based knowledge retrieval.

J.A.R.V.I.S. — Voice-Controlled Agentic AI OS | Python, React, FastAPI, WebSockets | [GitHub](#)

2026

- Developed a multi-agent system using a Groq LLaMA 3.3 70B router to classify voice/text queries and orchestrate 7 specialized agents for web, system, live data, website building, and automation.
- Engineered biometric verification using OpenCV LBPH face recognition and MFCC-based voice passphrase matching with automated OS locking and intruder event capture.
- Built a real-time React and WebSocket dashboard with audio visualization, biometric metrics, and intruder event logs.

Flowers Knowledge RAG Chatbot | Python, LangChain, Gemini, ChromaDB, Streamlit | [Live](#)

2025

- Built an end-to-end **RAG** pipeline using LangChain and ChromaDB with Google Gemini embeddings and recursive text splitting.
- Deployed a Streamlit Q&A application using grounded prompting, Google Gemini LLM, and fallback handling.

TECHNICAL SKILLS

Programming: Python, Java, C, SQL, React, Next.js, Node.js

AI / ML: TensorFlow, Scikit-Learn, NLP, Computer Vision, Generative AI, Agentic AI, AI Agents, Langflow

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Model Evaluation

Frameworks & APIs: FastAPI, LangChain, LangGraph, Streamlit

Databases: MongoDB, ChromaDB

Tools & Platforms: Git, Tableau, Power BI, Microsoft Azure

CERTIFICATIONS

Microsoft Certified: Azure Data Scientist Associate (DP-100) ([View Certificate](#))

2024

Microsoft Certified: Azure AI Engineer Associate (AI-102) ([View Certificate](#))

2025

Oracle Cloud Infrastructure Data Science Professional ([View Certificate](#))

2025

Oracle Cloud Infrastructure Generative AI Professional ([View Certificate](#))

2025
